Public consultation on an EU initiative for pollinators

Fields marked with * are mandatory.

Introduction

The initiative aims to tackle the decline of pollinators by increasing the effectiveness of EU policies for pollinators and raising the political profile of the issue. Addressing the decline of pollinators will support EU's efforts in halting the loss of biodiversity and implementing the Sustainable Development Goals.

This questionnaire aims to collect your views on the problem and how the EU can address it. You are invited to respond to the questionnaire, regardless of your level of expertise.

The questionnaire takes about **20 minutes to complete**. You can save your answers as draft and finish the survey later. The questionnaire is accessible in 23 EU languages and you can submit your reply in any of these languages. The questionnaire is structured as follows:

The **first part** of the questionnaire asks for some general information about you, the respondent, in order to better understand your perspective.

The **second part** covers your awareness about pollinators: their importance, status and the threats they are facing.

The **third part** covers the decline of pollinators: its extent, causes and consequences.

The **fourth part** asks you about possible solutions to address the decline of pollinators.

The **final section** allows you to provide final remarks or upload a document that you think is relevant to better explain your views.

Before responding to this survey, you are invited to read the following **background information** [Roadmap, consultation webpage].

I. General information about the respondent

Fields marked with * are mandatory.

* **Country of residence**

  Belgium
Region (optional)
- Région de Bruxelles-capitale/Brussels Hoofdstedelijk Gewest
- Vlaams Gewest
- Région Wallonne

*You are replying*
- as an individual in your personal capacity.
- in your professional capacity or on behalf of an organization.

*Respondent's first name*
George

*Respondent's last name*
Thurley

*Professional email address*
george@epha.org

*Name of the organisation*
European Public Health Alliance

*Is your organisation included in the Transparency Register?*
If your organisation is not registered, we invite you to register here, although it is not compulsory to be registered to reply to this consultation. Why a transparency register?
- Yes
- No
- Not applicable

*If yes, please indicate your Register ID number.*
18941013532-08

*Type of organisation*
Please select the answer option that fits best.
- Private enterprise
- Professional consultancy, law firm, self-employed consultant
- Trade, business or professional association
- Non-governmental organisation, platform or network
- Research and academia
- Churches and religious communities
- Regional or local authority (public or mixed)
National public authority
International organisation
Other

*Which of the following best describes your main field of activity or interest?
- agriculture
- agro-industry (chemical, seed or machinery)
- apiculture
- architecture
- bio-economy
- construction & development
- culture
- education
- energy
- environment
- extractive industry
- finance
- food/beverage industry
- forestry
- health
- horticulture
- hunting
- media and communication
- nature
- recreation
- science
- tourism
- transport
- urban planning and development
- other

*Your contribution
Note that, whatever option chosen, your answers may be subject to a request for public access to documents under Regulation (EC) N° 1049/2001

- can be published with your personal information (I consent to the publication of all information in my contribution in whole or in part under the name indicated, and I declare that nothing within my response is unlawful or would infringe the rights of any third party in a manner that would prevent publication)
- can be published provided that you remain anonymous (I consent to the publication of any information in my contribution in whole or in part (which may include quotes or opinions I express) provided that it is done anonymously. I declare that nothing within my response is unlawful or would infringe the rights of any third party in a manner that would prevent the publication)

II. Pollinators and their role

* 1. How well do you consider yourself informed about pollinators: their importance, status and trends, and the threats they are facing?
- Very well informed
- Well informed
- Somewhat informed
- Not well informed
- Not at all informed

* 2. What are your main sources of information on pollinators? Please choose maximum three options.

at most 3 choice(s)
- National newspapers
- Regional or local newspapers
- Magazines
- Television news
3. In your opinion, how important...

<table>
<thead>
<tr>
<th>Source</th>
<th>Indispensable</th>
<th>Important</th>
<th>Somewhat important</th>
<th>Not important</th>
<th>No opinion /Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>*...are pollinators for human well-being?</td>
<td></td>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*...is it to protect pollinators for future generations?</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4. Pollinators contribute to human society in different ways. For instance, their contribution to EU agriculture sector has been estimated at around EUR 15 billion per year. Protecting pollinators also involves costs. In your opinion, how do the potential costs of their protection compare with the socio-economic benefits that they provide?

- The costs and benefits are more or less equal
- The costs are much higher than the benefits
The costs are higher than the benefits
- The costs are lower than the benefits
- The costs are much lower than the benefits
- No opinion/Not sure

*5. Both wild and domesticated pollinators (like honeybees) pollinate agricultural crops in the EU. In your opinion, how do their respective contributions to crop pollination compare?
- Their contributions are more or less equal
- Domesticated pollinators contribute a lot more than wild pollinators
- Domesticated pollinators contribute more than wild pollinators
- Domesticated pollinators contribute less than wild pollinators
- Domesticated pollinators contribute a lot less than wild pollinators
- No opinion/Not sure

III. Decline of pollinators, its causes and consequences

*6. In your opinion, the current decline of pollinators in abundance and diversity is:
- Alarming
- Serious
- Moderate
- Negligible
- No opinion / Not sure

7. The decline of pollinators is due to several causes. Please indicate how important you consider the following causes.

<table>
<thead>
<tr>
<th>Cause</th>
<th>Very important</th>
<th>Important</th>
<th>Somewhat important</th>
<th>Not important</th>
<th>No opinion / Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>*1. Agricultural intensification</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>

### 8. To which extent do you consider that the decline of pollinators affects you in your private life?

- A lot
- Significantly
- Somewhat
- Not at all
- No opinion / Not sure

### 9. To which extent do you consider that the decline of pollinators affects you professionally?

- A lot
- Significantly
- Somewhat
- Not at all
- No opinion / Not sure

### IV. How to halt the decline of pollinators

### 10. In your opinion, how do the EU policies currently address the decline of pollinators?

- Very well
- Well
- Adequately
- Not well
- Not at all well
- No opinion/ Not sure
11. In your opinion, how do the policies of your country or region currently address the decline of pollinators?

- Very well
- Well
- Adequately
- Not well
- Not at all well
- No opinion/ Not sure

12. In your opinion, how much should the efforts to halt the decline of pollinators be stepped up at the following levels?

<table>
<thead>
<tr>
<th></th>
<th>A lot</th>
<th>Significantly</th>
<th>Somewhat</th>
<th>Not at all</th>
<th>No opinion / Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>International</td>

</tbody>
</table>

13. In your opinion, how important is to include the following actions in the EU Pollinators Initiative?

**Actions to improve knowledge**

<table>
<thead>
<tr>
<th>Action</th>
<th>Very important</th>
<th>Important</th>
<th>Somewhat</th>
<th>Important</th>
<th>Somewhat</th>
<th>Important</th>
<th>Not important</th>
<th>No opinion / Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>*1. Assess and monitor the decline of pollinators</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*2. Analyse threats to pollinators and the consequences of their decline</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*3. Promote innovation for the conservation of pollinators</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Actions to tackle the causes of decline**
<table>
<thead>
<tr>
<th>*4. Protect and restore pollinator habitats in Natura 2000 sites</th>
<th>Very important</th>
<th>Important</th>
<th>Somewhat important</th>
<th>Not important</th>
<th>No opinion / Not sure</th>
</tr>
</thead>
<tbody>
<tr>
<td>*5. Protect and restore pollinator habitats in rural areas outside Natura 2000 sites</td>
<td></td>
<td></td>
<td></td>

<tr>
<td>*6. Protect and restore pollinator habitats in urban areas outside Natura 2000 sites</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*7. Assess risks of pesticides to pollinators</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*8. Implement Integrated Pest Management</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*9. Combat invasive alien species</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*10. Mitigate climate change impacts on pollinators</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*11. Reduce pollution (including light pollution)</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*12. Protect pollinators from diseases</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*13. Support the efforts of the private sector</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>*14. Create market incentives for pollinator friendly activities</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Actions to raise awareness, improve collaboration and knowledge sharing**

<table>
<thead>
<tr>
<th>*15. Engage local communities</th>
<th>Very important</th>
<th>Important</th>
<th>Somewhat important</th>
<th>Not important</th>
<th>No opinion / Not sure</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>*17. Support collaboration among Member States</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
V. Final remarks

If you wish to add further information - within the scope of this questionnaire - please feel free to do so here. 

2000 character(s) maximum

EPHA stresses the benefits for human health and well-being provided by pollination, and the need to ensure these can continue sustainably. Pollinators contribute to the agricultural yield for 35% of global food production (Klein et al http://bit.ly/2EZ9w0C), while animal-pollinated crops contain the majority of several vitamins (A, C & E) and minerals (calcium, fluoride & iron) available for diets worldwide. (Eilers et al http://bit.ly/2nQXgYl). Therefore pollinators are vital for both food and nutrition security.

Among the key food types that would be affected by pollinator loss are fruit, vegetables, nuts and seeds which are crucial for ensuring good dietary health. Insufficient consumption of these products is linked to many non-communicable diseases (NCDs) including cardiovascular disease, diabetes and cancer. Low consumption of fruit and vegetables are among the biggest risk factors for cardiovascular disease (EHN http://bit.ly/2zgDrgs) Most Europeans do not meet WHO fruit & vegetable consumption recommendations (EUFIC http://bit.ly/2sqMFip) and further pollinator loss would make this harder.

Total global pollinator loss would lead to 1.42m more deaths annually due to increased incidence of NCDs and malnutrition-related disease, mostly attributable to low intake of fruit, vegetables, nuts and seeds. The average global fruit supply could fall 22.9% and vegetables by 16.3% with resultant negative impacts on diet and health. Eastern Europe may be particularly vulnerable due to high prevalence of chronic and metabolic disease and high dependence on pollinator-related fruit & vegetables. (Smith http://bit.ly/2smGMfv)

Given pollinators’ key role in the production of many varieties of fruits, vegetables, nuts and seeds and the contribution of these foods to nutritionally-balanced, sustainable and healthy diets, it is clear that action is required to prevent pollinator loss and protect existing populations, in order to help support good dietary health in Europe.

Please upload your file

The maximum file size is 1 MB.

Please note that the uploaded document will be published alongside your response to the questionnaire which is the essential input to this open public consultation. The document is an optional complement and serves as additional background reading to better understand your position.
