Belgium

### Initiative

[EU farm policy – impact on society and the economy in rural areas](#)

The European Public Health Alliance (EPHA) welcomes this evaluation, and wishes to stress the importance of socio-economic conditions as determinants of people's health and well-being.

In this light, it is key to include health considerations as part of the impact assessment process. This follows on the obligation of Article 168(1) TFEU which mandates that every EU policy and action, including the CAP, should pursue a high level of health protection. Health impact assessment is also part of the Commission's better regulation toolbox: Tool #31 Health impacts.
