Introduction

- first, a proposal of new and revised rules to deepen the Single Market for Digital Services, by increasing and harmonising the responsibilities of online platforms and information service providers and reinforce the oversight over platforms' content policies in the EU;
- second, ex ante rules to ensure that markets characterised by large platforms with significant network effects acting as gatekeepers, remain fair and contestable for innovators, businesses, and new market entrants.

This consultation

The Commission is initiating the present open public consultation as part of its evidence-gathering exercise, in order to identify issues that may require intervention through the Digital Services Act, as well as additional topics related to the environment of digital services and online platforms, which will be further analysed in view of possible upcoming initiatives, should the issues identified require a regulatory intervention.

The consultation contains 6 modules (you can respond to as many as you like):

1. How to effectively keep users safer online?
2. Reviewing the liability regime of digital services acting as intermediaries?
3. What issues derive from the gatekeeper power of digital platforms?
4. Other emerging issues and opportunities, including online advertising and smart contracts
5. How to address challenges around the situation of self-employed individuals offering services through online platforms?
6. What governance for reinforcing the Single Market for digital services?

Digital services and other terms used in the questionnaire

The questionnaire refers to digital services (or ‘information society services’, within the meaning of the E-Commerce Directive), as ‘services provided through electronic means, at
a distance, at the request of the user'. It also refers more narrowly to a subset of digital services here termed **online intermediary services**. By this we mean services such as internet access providers, cloud services, online platforms, messaging services, etc., i.e. services that generally transport or intermediate content, goods or services made available by third parties.

Parts of the questionnaire specifically focus on **online platforms** – such as e-commerce marketplaces, search engines, app stores, online travel and accommodation platforms or mobility platforms and other collaborative economy platforms, etc.

Other terms and other technical concepts are explained in a glossary (https://ec.europa.eu/eusurvey/files/b77fbb2f-fd46-4dfd-8fc9-ecea1353266a/0da338ef-fea6-4e44-b2ef-a665a91604cf).

**How to respond**

Make sure to **save your draft** regularly as you fill in the questionnaire.

You can break off and return to finish it at any time.

At the end, you will also be able to upload a document or add other issues not covered in detail in the questionnaire.

**Deadline for responses**

8 September 2020.

**Languages**

You can submit your response in any official EU language.

The questionnaire is available in 23 of the EU's official languages. You can switch languages from the menu at the top of the page.

---

**About you**

1. **Language of my contribution**
   
   English

2. **I am giving my contribution as**
   
   Non-governmental organisation (NGO)

3. **First name**
   
   Sascha

4. **Surname**

5 Email (this won’t be published)

sascha@epha.org

7 Organisation name

255 character(s) maximum

European Public Health Alliance (EPHA)

8 Organisation size

Small (10 to 49 employees)

10 Are you self-employed and offering services through an online platform?

☐ Yes

☐ No

16 Does your organisation play a role in:

☐ Flagging illegal activities or information to online intermediaries for removal

☐ Fact checking and/or cooperating with online platforms for tackling harmful (but not illegal) behaviours

☐ Representing fundamental rights in the digital environment

☐ Representing consumer rights in the digital environment

☐ Representing rights of victims of illegal activities online

☐ Representing interests of providers of services intermediated by online platforms

☐ Other

17 Is your organisation a

☐ Law enforcement authority, in a Member State of the EU

☐ Government, administrative or other public authority, other than law enforcement, in a Member State of the EU

☐ Other, independent authority, in a Member State of the EU

☐ EU-level authority

☐ International level authority, other than at EU level

☐ Other

18 Is your business established in the EU?

☐ Yes

☐ No

19 Please select the EU Member States where your organisation is established or currently has a legal representative in:

☐ Austria

☐ Belgium

☐ Bulgaria

☐ Croatia
20 Transparency register number

255 character(s) maximum

Check if your organisation is on the transparency register (http://ec.europa.eu/transparencyregister/public/homePage.do?redir=false&locale=en). It's a voluntary database for organisations seeking to influence EU decision-making.

18941013532-08

21 Country of origin

Please add your country of origin, or that of your organisation.

Belgium

22 Publication privacy settings

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

- **Anonymous**
  Only your type of respondent, country of origin and contribution will be published. All other personal details (name, organisation name and size, transparency register number) will not be published.

- **Public**
  Your personal details (name, organisation name and size, transparency register number, country of origin) will be published with your contribution.

I agree with the personal data protection provisions (https://ec.europa.eu/info/law/better-regulation/specific-privacy-statement_en)
I. How to effectively keep users safer online?

This module of the questionnaire is structured into several subsections:

First, it seeks evidence, experience, and data from the perspective of different stakeholders regarding illegal activities online, as defined by national and EU law. This includes the availability online of illegal goods (e.g. dangerous products, counterfeit goods, prohibited and restricted goods, protected wildlife, pet trafficking, illegal medicines, misleading offerings of food supplements), content (e.g. illegal hate speech, child sexual abuse material, content that infringes intellectual property rights), and services, or practices that infringe consumer law (such as scams, misleading advertising, exhortation to purchase made to children) online. It covers all types of illegal activities, both as regards criminal law and civil law. It then asks you about other activities online that are not necessarily illegal but could cause harm to users, such as the spread of online disinformation or harmful content to minors. It also seeks facts and informed views on the potential risks of erroneous removal of legitimate content. It also asks you about the transparency and accountability of measures taken by digital services and online platforms in particular in intermediating users’ access to their content and enabling oversight by third parties. Respondents might also be interested in related questions in the module of the consultation focusing on online advertising.

Second, it explores proportionate and appropriate responsibilities and obligations that could be required from online intermediaries, in particular online platforms, in addressing the set of issues discussed in the first sub-section. This module does not address the liability regime for online intermediaries, which is further explored in the next module of the consultation.

1. Main issues and experiences

A. Experiences and data on illegal activities online

Illegal goods

1 Have you ever come across illegal goods on online platforms (e.g. a counterfeit product, prohibited and restricted goods, protected wildlife, pet trafficking, illegal medicines, misleading offerings of food supplements)?
   - No, never
   - Yes, once
   - Yes, several times
   - I don’t know

2 What measure did you take?
   - I sent the product back to the seller
   - I reported it to the platform via its existing reporting procedure
   - I contacted the platform through other means
   - I notified a public authority
   - I notified a consumer organisation
   - I did not take any action
3 Please specify.

3,000 character(s) maximum

4 How easy was it for you to find information on where you could report the illegal good?

Please rate from 1 star (very difficult) to 5 stars (very easy)

5 How easy was it for you to report the illegal good?

Please rate from 1 star (very difficult) to 5 stars (very easy)

6 How satisfied were you with the procedure following your report?

Please rate from 1 star (very dissatisfied) to 5 stars (very satisfied)

7 Are you aware of the action taken following your report?

- Yes
- No

8 Please explain

3,000 character(s) maximum

9 In your experience, were such goods more easily accessible online since the outbreak of COVID-19?

- No, I do not think so
- Yes, I came across illegal offerings more frequently
- I don't know

10 What good practices can you point to in handling the availability of illegal goods online since the start of the COVID-19 outbreak?

5,000 character(s) maximum

Illegal content

11 Did you ever come across illegal content online (for example illegal incitement to violence, hatred or discrimination on any protected grounds such as race, ethnicity, gender or sexual orientation; child sexual abuse material; terrorist propaganda; defamation; content that infringes intellectual property rights, consumer law infringements)?

- No, never
- Yes, once
- Yes, several times
- I don't know

12 What measure did you take?
I reported it to the platform via its existing reporting procedure
I contacted the online platform by other means to report the illegal content
I contacted a national authority
I contacted a consumer organisation
I did not take any action
☑ I took a different action. Please specify in the text box below

13 Please specify
3,000 character(s) maximum

Discussions with organisations representing vulnerable groups in the EU policy context.

14 How easy was it for you to find information on where you could report the illegal content/activity?

Please rate from 1 star (very difficult) to 5 stars (very easy)

15 How easy was it for you to report the illegal content/activity?

Please rate from 1 star (very difficult) to 5 stars (very easy)

16 How satisfied were you with the procedure following your report?

Please rate from 1 star (very dissatisfied) to 5 stars (very satisfied)

17 Are you aware of the action taken following your report?
☑ Yes
☐ No

18 How has the dissemination of illegal content changed since the outbreak of COVID-19? Please explain.
3,000 character(s) maximum

EPHA members from across Europe have reported an increase in illegal and discriminatory content and hate speech online. Anti-democratic and criminal groups are taking advantage of people's fears around the pandemic by spreading fake news, disseminating illegal content and targeting the most vulnerable.

19 What good practices can you point to in handling the dissemination of illegal content online since the outbreak of COVID-19?
3,000 character(s) maximum

EPHA is looking to obtain more information about such good practices, but given the global infrastructure of the Internet and involvement of platforms based in third countries the impression is that it is difficult to control such content.

20 What actions do online platforms take to minimise risks for consumers to be exposed to scams and other unfair practices (e.g. misleading advertising, exhortation to purchase made to children)?
Do you consider these measures appropriate?
- Yes
- No
- I don't know

Please explain.

More must be done to protect the health of children and individuals who do not possess sufficient skills and knowledge to recognise and ward off online scams and unfair practices.

B. Transparency

1 If your content or offering of goods and services was ever removed or blocked from an online platform, were you informed by the platform?
- Yes, I was informed before the action was taken
- Yes, I was informed afterwards
- Yes, but not on every occasion / not by all the platforms
- No, I was never informed
- I don't know

3 Please explain.

4 If you provided a notice to a digital service asking for the removal or disabling of access to such content or offering of goods or services, were you informed about the follow-up to the request?
- Yes, I was informed
- Yes, but not on every occasion / not by all platforms
- No, I was never informed
- I don't know

5 When content is recommended to you - such as products to purchase on a platform, or videos to watch, articles to read, users to follow - are you able to obtain enough information on why such content has been recommended to you? Please explain.

No, it often appears random and disconnected from previous online choices that individuals have made. The algorithmic processes deployed by online platforms often do not result in recommendations that correspond to people's real preferences and needs.
C. Activities that could cause harm but are not, in themselves, illegal

1 In your experience, are children adequately protected online from harmful behaviour, such as grooming and bullying, or inappropriate content?  
**3,000 character(s) maximum**

There is much evidence that children and young people are exposed to online commercial communications for obesogenic foods and alcohol. There is convincing evidence that exposure of children to the marketing of such products influences their consumption patterns with potential health implications throughout the life course. Unhealthy diet and alcohol use are primary risk factors for non-communicable diseases (NCDs), such as cardiovascular diseases, cancers, diabetes, respiratory diseases, representing over 85% of all deaths and 75% of all diseases in Europe. Even when a government has chosen not to make certain marketing practices illegal through statutory legislation, unhealthy food and alcohol marketing are increasingly perceived as raising children’s rights issues.

2 To what extent do you agree with the following statements related to online disinformation?

<table>
<thead>
<tr>
<th>Statement</th>
<th>Fully agree</th>
<th>Somewhat agree</th>
<th>Neither agree not disagree</th>
<th>Some what disagree</th>
<th>Fully disagree</th>
<th>I don’t know/ No reply</th>
</tr>
</thead>
<tbody>
<tr>
<td>Online platforms can easily be manipulated by foreign governments or other coordinated groups to spread divisive messages</td>
<td></td>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3 Please explain.  
**3,000 character(s) maximum**

The workings of online platforms remain opaque to ordinary people, and the presence of many different actors involved in data collection, analysis and processing makes it very hard to understand who has responsibility for what. This is further complicated by the global nature of the Internet, with providers being located in third countries and personal data being stored in the Cloud.
4 In your personal experience, how has the spread of harmful (but not illegal) activities online changed since the outbreak of COVID-19? Please explain.

3,000 character(s) maximum

The spread of harmful activities online appears to have increased given that more people are online all the time. Companies are exploiting the available options to make harmful products and information available in every which way they can, taking advantage of the pandemic.

5 What good practices can you point to in tackling such harmful activities since the outbreak of COVID-19?

3,000 character(s) maximum

Too little information is publicly available about such good practices, and there appear to be many regulatory and technological loopholes.

D. Experiences and data on erroneous removals

This section covers situations where content, goods or services offered online may be removed erroneously contrary to situations where such a removal may be justified due to for example illegal nature of such content, good or service (see sections of this questionnaire above).

1 Are you aware of evidence on the scale and impact of erroneous removals of content, goods, services, or banning of accounts online? Are there particular experiences you could share?

5,000 character(s) maximum

The following questions are targeted at organisations.

Individuals responding to the consultation are invited to go to section 2 here below on responsibilities for online platforms and other digital services

3 What is your experience in flagging content, or offerings of goods or services you deemed illegal to online platforms and/or other types of online intermediary services? Please explain in what capacity and through what means you flag content.

3,000 character(s) maximum

4 If applicable, what costs does your organisation incur in such activities?

3,000 character(s) maximum

5 Have you encountered any issues, in particular, as regards illegal content or goods accessible from the EU but intermediated by services established in third countries? If yes, how have you dealt with these?

3,000 character(s) maximum
6 If part of your activity is to send notifications or orders for removing illegal content or goods or services made available through online intermediary services, or taking other actions in relation to content, goods or services, please explain whether you report on your activities and their outcomes:
- Yes, through regular transparency reports
- Yes, through reports to a supervising authority
- Yes, upon requests to public information
- Yes, through other means. Please explain
- No, no such reporting is done

8 Does your organisation access any data or information from online platforms?
- Yes, data regularly reported by the platform, as requested by law
- Yes, specific data, requested as a competent authority
- Yes, through bilateral or special partnerships
- Yes, on the basis of a contractual agreement with the platform
- Yes, generally available transparency reports
- Yes, through generally available APIs (application programme interfaces)
- Yes, through web scraping or other independent web data extraction approaches
- Yes, because users made use of their right to port personal data
- Yes, other. Please specify in the text box below
- No

10 What sources do you use to obtain information about users of online platforms and other digital services – such as sellers of products online, service providers, website holders or providers of content online? For what purpose do you seek this information?

3,000 character(s) maximum

11 Do you use WHOIS information about the registration of domain names and related information?
- Yes
- No
- I don't know

13 How valuable is this information for you?

Please rate from 1 star (not particularly important) to 5 (extremely important)

14 Do you use or are you aware of alternative sources of such data? Please explain.

3,000 character(s) maximum

Not aware.

The following questions are targeted at online intermediaries.

A. Measures taken against illegal goods, services and content online shared by users
1 What systems, if any, do you have in place for addressing illegal activities conducted by the users of your service (sale of illegal goods - e.g. a counterfeit product, an unsafe product, prohibited and restricted goods, wildlife and pet trafficking - dissemination of illegal content or illegal provision of services)?

- A notice-and-action system for users to report illegal activities
- A dedicated channel through which authorities report illegal activities
- Cooperation with trusted organisations who report illegal activities, following a fast-track assessment of the notification
- A system for the identification of professional users ('know your customer')
- A system for penalising users who are repeat offenders
- A system for informing consumers that they have purchased an illegal good, once you become aware of this
- Multi-lingual moderation teams
- Automated systems for detecting illegal activities. Please specify the detection system and the type of illegal content it is used for
- Other systems. Please specify in the text box below
- No system in place

2 Please explain.

5,000 character(s) maximum

3 What issues have you encountered in operating these systems?

5,000 character(s) maximum

4 On your marketplace (if applicable), do you have specific policies or measures for the identification of sellers established outside the European Union?

- Yes
- No

5 Please quantify, to the extent possible, the costs of the measures related to ‘notice-and-action’ or other measures for the reporting and removal of different types of illegal goods, services and content, as relevant.

5,000 character(s) maximum

6 Please provide information and figures on the amount of different types of illegal content, services and goods notified, detected, removed, reinstated and on the number or complaints received from users. Please explain and/or link to publicly reported information if you publish this in regular transparency reports.

5,000 character(s) maximum

7 Do you have in place measures for detecting and reporting the incidence of suspicious behaviour (i.e. behaviour that could lead to criminal acts such as acquiring materials for such acts)?

3,000 character(s) maximum
B. Measures against other types of activities that might be harmful but are not, in themselves, illegal

1 Do your terms and conditions and/or terms of service ban activities such as:
   - Spread of political disinformation in election periods?
   - Other types of coordinated disinformation e.g. in health crisis?
   - Harmful content for children?
   - Online grooming, bullying?
   - Harmful content for other vulnerable persons?
   - Content which is harmful to women?
   - Hatred, violence and insults (other than illegal hate speech)?
   - Other activities which are not illegal per se but could be considered harmful?

2 Please explain your policy.
   5,000 character(s) maximum

3 Do you have a system in place for reporting such activities? What actions do they trigger?
   3,000 character(s) maximum

4 What other actions do you take? Please explain for each type of behaviour considered.
   5,000 character(s) maximum

5 Please quantify, to the extent possible, the costs related to such measures.
   5,000 character(s) maximum

6 Do you have specific policies in place to protect minors from harmful behaviours such as online grooming or bullying?
   - Yes
   - No

7 Please explain.
   3,000 character(s) maximum

C. Measures for protecting legal content goods and services

1 Does your organisation maintain an internal complaint and redress mechanism to your users for instances where their content might be erroneously removed, or their accounts blocked?
   - Yes
   - No
2 What action do you take when a user disputes the removal of their goods or content or services, or restrictions on their account? Is the content/good reinstated?

5,000 character(s) maximum

3 What are the quality standards and control mechanism you have in place for the automated detection or removal tools you are using for e.g. content, goods, services, user accounts or bots?

3,000 character(s) maximum

4 Do you have an independent oversight mechanism in place for the enforcement of your content policies?

- Yes
- No

5 Please explain.

5,000 character(s) maximum

D. Transparency and cooperation

1 Do you actively provide the following information:

- Information to users when their good or content is removed, blocked or demoted
- Information to notice providers about the follow-up on their report
- Information to buyers of a product which has then been removed as being illegal

2 Do you publish transparency reports on your content moderation policy?

- Yes
- No

3 Do the reports include information on:

- Number of takedowns and account suspensions following enforcement of your terms of service?
- Number of takedowns following a legality assessment?
- Notices received from third parties?
- Referrals from authorities for violations of your terms of service?
- Removal requests from authorities for illegal activities?
- Number of complaints against removal decisions?
- Number of reinstated content?
- Other, please specify in the text box below

4 Please explain.

5,000 character(s) maximum

5 What information is available on the automated tools you use for identification of illegal content, goods or services and their performance, if applicable? Who has access to this information? In what formats?
6 How can third parties access data related to your digital service and under what conditions?

- Contractual conditions
- Special partnerships
- Available APIs (application programming interfaces) for data access
- Reported, aggregated information through reports
- Portability at the request of users towards a different service
- At the direct request of a competent authority
- Regular reporting to a competent authority
- Other means. Please specify

7 Please explain or give references for the different cases of data sharing and explain your policy on the different purposes for which data is shared.

The following questions are open for all respondents.

2. Clarifying responsibilities for online platforms and other digital services

1 What responsibilities (i.e. legal obligations) should be imposed on online platforms and under what conditions?

Should such measures be taken, in your view, by all online platforms, or only by specific ones (e.g. depending on their size, capability, extent of risks of exposure to illegal activities conducted by their users)? If you consider that some measures should only be taken by large online platforms, please identify which would these measures be.

<table>
<thead>
<tr>
<th>Maintain an effective ‘notice and action’ system for reporting illegal goods or content</th>
<th>Yes, by all online platforms, based on the activities they intermediate (e.g. content hosting, selling goods or services)</th>
<th>Yes, only by larger online platforms</th>
<th>Yes, only platforms at particular risk of exposure to illegal activities by their users</th>
<th>Such measures should not be required by law</th>
</tr>
</thead>
<tbody>

</tbody>
</table>

2 Please elaborate, if you wish to further explain your choices.

5,000 character(s) maximum
3 What information would be, in your view, necessary and sufficient for users and third parties to send to an online platform in order to notify an illegal activity (sales of illegal goods, offering of services or sharing illegal content) conducted by a user of the service?

- Precise location: e.g. URL
- Precise reason why the activity is considered illegal
- Description of the activity
- Identity of the person or organisation sending the notification. Please explain under what conditions such information is necessary:
- Other, please specify

4 Please explain

3,000 character(s) maximum

5 How should the reappearance of illegal content, goods or services be addressed, in your view? What approaches are effective and proportionate?

5,000 character(s) maximum

6 Where automated tools are used to detect illegal content, goods or services, what opportunities and risks does their use present as regards different types of illegal activities and the particularities of the different types of tools?

3,000 character(s) maximum

Clearly, automated tools must be programmed in such a way that the range of possible types of illegal activities and the particularities of different types of tools is captured. It is questionable whether this is possible in practice, even with AI and Big Data-powered algorithms.

7 How should the spread of illegal goods, services or content across multiple platforms and services be addressed? Are there specific provisions necessary for addressing risks brought by:

a. Digital services established outside of the Union?

b. Sellers established outside of the Union, who reach EU consumers through online platforms?

3,000 character(s) maximum

Service providers and sellers established outside of the Union must be subject to the same strict rules as those established within the EU or else there are loopholes that can threaten public health and harm individuals using services and buying products from outside of the EU.

8 What would be appropriate and proportionate measures for digital services acting as online intermediaries, other than online platforms, to take – e.g. other types of hosting services, such as web hosts, or services deeper in the internet stack, like cloud infrastructure services, content distribution services, DNS services, etc.?

5,000 character(s) maximum
EPHA does not have information about such measures, but clearly there is a need to establish appropriate measures to be taken by digital services acting as online intermediaries, covering the range of possible situations.

9. What should be the rights and responsibilities of other entities, such as authorities, or interested third-parties such as civil society organisations or equality bodies in contributing to tackle illegal activities online?

5,000 character(s) maximum

Clear rules and opportunities to easily report and act upon illegal activities online.

10. What would be, in your view, appropriate and proportionate measures for online platforms to take in relation to activities or content which might cause harm but are not necessarily illegal?

5,000 character(s) maximum

Causing harm means a potentially negative impact on people’s physical or mental health, which must be avoided at all costs to protect public health and fundamental rights.

11. In particular, are there specific measures you would find appropriate and proportionate for online platforms to take in relation to potentially harmful activities or content concerning minors? Please explain.

5,000 character(s) maximum

12. Please rate the necessity of the following measures for addressing the spread of disinformation online. Please rate from 1 (not at all necessary) to 5 (essential) each option below.

<table>
<thead>
<tr>
<th>Measure</th>
<th>1 (not at all necessary)</th>
<th>2</th>
<th>3 (neutral)</th>
<th>4</th>
<th>5 (essential)</th>
<th>I don’t know / No answer</th>
</tr>
</thead>

<td>5</td>
<td>0</td>
</tr>
</tbody>
</table>
13 Please specify
3,000 character(s) maximum

14 In special cases, where crises emerge and involve systemic threats to society, such as a health pandemic, and fast-spread of illegal and harmful activities online, what are, in your view, the appropriate cooperation mechanisms between digital services and authorities?

3,000 character(s) maximum

EPHA does not have sufficient information about such cooperation mechanisms, which demonstrates that little is publicly known about how it operates in practice. More transparency and civil society engagement in such important questions would be appreciated.

15 What would be effective measures service providers should take, in your view, for protecting the freedom of expression of their users? Please rate from 1 (not at all necessary) to 5 (essential).

1 (not at all necessary)  2  3 (neutral)  4  5 (essential)  I don't know / No answer

High standards of transparency on their terms of service and removal decisions

©
Diligence in assessing the content notified to them for removal or blocking
Maintaining an effective complaint and redress mechanism
Diligence in informing users whose content/goods/services was removed or blocked or whose accounts are threatened to be suspended
High accuracy and diligent control mechanisms, including human oversight, when automated tools are deployed for detecting, removing or demoting content or suspending users’ accounts
Enabling third party insight – e.g. by academics – of main content moderation systems
Other. Please specify

16 Please explain.

3,000 character(s) maximum

17 Are there other concerns and mechanisms to address risks to other fundamental rights such as freedom of assembly, non-discrimination, gender equality, freedom to conduct a business, or rights of the child? How could these be addressed?

5,000 character(s) maximum

Mandatory acceptance of these principles and unambiguous policies by online platforms and digital service providers.

18 In your view, what information should online platforms make available in relation to their policy and measures taken with regard to content and goods offered by their users? Please elaborate, with regard to the identification of illegal content and goods, removal, blocking or demotion of content or goods offered, complaints mechanisms and reinstatement, the format and frequency of such information, and who can access the information.

5,000 character(s) maximum

19 What type of information should be shared with users and/or competent authorities and other third parties such as trusted researchers with regard to the use of automated systems used by online platforms to detect, remove and/or block illegal content, goods, or user accounts?

5,000 character(s) maximum

20 In your view, what measures are necessary with regard to algorithmic recommender systems used by online platforms?

5,000 character(s) maximum

Human oversight and regular checks for compatibility and appropriateness.
21 In your view, is there a need for enhanced data sharing between online platforms and authorities, within the boundaries set by the General Data Protection Regulation? Please select the appropriate situations, in your view:

- For supervisory purposes concerning professional users of the platform - e.g. in the context of platform intermediated services such as accommodation or ride-hailing services, for the purpose of labour inspection, for the purpose of collecting tax or social security contributions
- For supervisory purposes of the platforms’ own obligations – e.g. with regard to content moderation obligations, transparency requirements, actions taken in electoral contexts and against inauthentic behaviour and foreign interference
- Specific request of law enforcement authority or the judiciary
- On a voluntary and/or contractual basis in the public interest or for other purposes

22 Please explain. What would be the benefits? What would be concerns for companies, consumers or other third parties?

5,000 character(s) maximum

23 What types of sanctions would be effective, dissuasive and proportionate for online platforms which systematically fail to comply with their obligations (See also the last module of the consultation)?

5,000 character(s) maximum

- Online platforms that systematically fail to comply with their obligations should be put out of business as they can harm individuals and population groups.

24 Are there other points you would like to raise?

3,000 character(s) maximum

II. Reviewing the liability regime of digital services acting as intermediaries?

The liability of online intermediaries is a particularly important area of internet law in Europe and worldwide. The E-Commerce Directive harmonises the liability exemptions applicable to online intermediaries in the single market, with specific provisions for different services according to their role: from Internet access providers and messaging services to hosting service providers.

The previous section of the consultation explored obligations and responsibilities which online platforms and other services can be expected to take – i.e. processes they should put in place to address illegal activities which might be conducted by users abusing their service. In this section, the focus is on the legal architecture for the liability regime for service providers when it comes to illegal activities conducted by their users. The Commission seeks informed views on how the current liability exemption regime is working and the areas where an update might be necessary.

2 The liability regime for online intermediaries is primarily established in the E-Commerce Directive, which distinguishes between different types of services: so called ‘mere conduits’, ‘caching services’, and ‘hosting services’.

In your understanding, are these categories sufficiently clear and complete for characterising and regulating today’s digital intermediary services? Please explain.
They are not sufficiently clear to most people who do not have specialised knowledge of the eCommerce regime.

For hosting services, the liability exemption for third parties’ content or activities is conditioned by a knowledge standard (i.e. when they get ‘actual knowledge’ of the illegal activities, they must ‘act expeditiously’ to remove it, otherwise they could be found liable).

3 Are there aspects that require further legal clarification?

Regarding digital services pertaining to the health sector, "suspected" knowledge of illegal activities should also constitute a standard to ensure that no loopholes can be exploited.

4 Does the current legal framework dis-incentivize service providers to take proactive measures against illegal activities? If yes, please provide your view on how disincentives could be corrected.

5 Do you think that the concept characterising intermediary service providers as playing a role of a ‘mere technical, automatic and passive nature’ in the transmission of information (recital 42 of the E-Commerce Directive (https://eur-lex.europa.eu/legal-content/EN/ALL/?uri=CELEX%3A32000L0031)) is sufficiently clear and still valid? Please explain.

It is not sufficiently clear, and given the increasingly interconnected nature of activities of digital businesses, it might be hard to claim that certain intermediary service providers are merely "passive" when they are also "actively" engaging in other activities in parallel.

6 The E-commerce Directive also prohibits Member States from imposing on intermediary service providers general monitoring obligations or obligations to seek facts or circumstances of illegal activities conducted on their service by their users.

In your view, is this approach, balancing risks to different rights and policy objectives, still appropriate today? Is there further clarity needed as to the parameters for ‘general monitoring obligations’? Please explain.

General monitoring obligations should also apply to intermediary service providers where these can contribute to ensuring that illegal products and content can be prevented from reaching and/or influencing ordinary people, including patients and vulnerable groups.

7 Do you see any other points where an upgrade may be needed for the liability regime of digital services acting as intermediaries?
Europe needs a regulatory framework that will ensure greater liability of digital services acting as intermediaries. This is especially so for content service providers actively distribute themselves, notably advertising. Moreover, advertising and other commercial communications are a main source of revenue requiring special accountability regimes.

III. What issues derive from the gatekeeper power of digital platforms?

There is wide consensus concerning the benefits for consumers and innovation, and a wide-range of efficiencies, brought about by online platforms in the European Union’s Single Market. Online platforms facilitate cross-border trading within and outside the EU and open entirely new business opportunities to a variety of European businesses and traders by facilitating their expansion and access to new markets. At the same time, regulators and experts around the world consider that large online platforms are able to control increasingly important online platform ecosystems in the digital economy. Such large online platforms connect many businesses and consumers. In turn, this enables them to leverage their advantages – economies of scale, network effects and important data assets- in one area of their activity to improve or develop new services in adjacent areas. The concentration of economic power in then platform economy creates a small number of ‘winner-takes it all/most’ online platforms. The winner online platforms can also readily take over (potential) competitors and it is very difficult for an existing competitor or potential new entrant to overcome the winner’s competitive edge.

The Commission announced (https://ec.europa.eu/info/publications/communication-shaping-europes-digital-future_en) that it ‘will further explore, in the context of the Digital Services Act package, ex ante rules to ensure that markets characterised by large platforms with significant network effects acting as gatekeepers, remain fair and contestable for innovators, businesses, and new market entrants’. This module of the consultation seeks informed views from all stakeholders on this framing, on the scope, the specific perceived problems, and the implications, definition and parameters for addressing possible issues deriving from the economic power of large, gatekeeper platforms.

The Communication ‘Shaping Europe’s Digital Future’ (https://ec.europa.eu/info/publications/communication-shaping-europes-digital-future_en) also flagged that ‘competition policy alone cannot address all the systemic problems that may arise in the platform economy’. Stakeholders are invited to provide their views on potential new competition instruments through a separate, dedicated open public consultation that will be launched soon.

In parallel, the Commission is also engaged in a process of reviewing EU competition rules and ensuring they are fit for the modern economy and the digital age. As part of that process, the Commission has launched a consultation on the proposal for a New Competition Tool aimed at addressing the gaps identified in enforcing competition rules. The initiative intends to address as specific objectives the structural competition problems that prevent markets from functioning properly and that can tilt the level playing field in favour of only a few market players. This could cover certain digital or digitally-enabled markets, as identified in the report by the Special Advisers and other recent reports on the role of competition policy, and/or other sectors. As such, the work on a proposed new competition tool and the initiative at stake complement each other. The work on the two impact assessments will be conducted in parallel in order to ensure a coherent outcome. In this context, the Commission will take into consideration the feedback received from both consultations. We would therefore invite you, in preparing your responses to the questions below, to also consider your response to the parallel consultation on a new competition tool (https://ec.europa.eu/eusurvey/runner/New_Competition_Tool).

1 To what extent do you agree with the following statements?

</tr>
</tbody>
</table>
Large online platforms often leverage their assets from their primary activities (customer base, data, technological solutions, skills, financial capital) to expand into other activities.

When large online platform companies expand into such new activities, this often poses a risk of reducing innovation and deterring competition from smaller innovative market operators.

### Main features of gatekeeper online platform companies and the main criteria for assessing their economic power

1. Which characteristics are relevant in determining the gatekeeper role of large online platform companies? Please rate each criterion identified below from 1 (not relevant) to 5 (very relevant):

<table>
<thead>
<tr>
<th>Criteria</th>

2 If you replied "other", please list

3,000 character(s) maximum

3 Please explain your answer. How could different criteria be combined to accurately identify large online platform companies with gatekeeper role?

3,000 character(s) maximum

4 Do you believe that the integration of any or all of the following activities within a single company can strengthen the gatekeeper role of large online platform companies ('conglomerate effect')? Please select the activities you consider to strengthen the gatekeeper role:

- ✔ online intermediation services (i.e. consumer-facing online platforms such as e-commerce marketplaces, social media, mobile app stores, etc., as per Regulation (EU) 2019/1150 (https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32019R1150) - see glossary)
- ✔ search engines
- ✔ operating systems for smart devices
- ✔ consumer reviews on large online platforms
- ✔ network and/or data infrastructure/cloud services
- ✔ digital identity services
- ✔ payment services (or other financial services)
- ✔ physical logistics such as product fulfilment services
- ✔ data management platforms
- ✔ online advertising intermediation services
- ✗ other. Please specify in the text box below.

5 Other - please list

---

**Emerging issues**

The following questions are targeted particularly at businesses and business users of large online platform companies.

2 As a business user of large online platforms, do you encounter issues concerning trading conditions on large online platform companies?

- Yes
- ✗ No

3 Please specify which issues you encounter and please explain to what types of platform these are related to (e.g. e-commerce marketplaces, app stores, search engines, operating systems, social networks).

5,000 character(s) maximum
4 Have you been affected by unfair contractual terms or unfair practices of very large online platform companies? Please explain your answer in detail, pointing to the effects on your business, your consumers and possibly other stakeholders in the short, medium and long-term? 

5,000 character(s) maximum

---

The following questions are targeted particularly at consumers who are users of large online platform companies.

6 Do you encounter issues concerning commercial terms and conditions when accessing services provided by large online platform companies? Please specify which issues you encounter and please explain to what types of platform these are related to (e.g. e-commerce marketplaces, app stores, search engines, operating systems, social networks). 

5,000 character(s) maximum

7 Have you considered any of the practices by large online platform companies as unfair? Please explain. 

3,000 character(s) maximum

---

The following questions are open to all respondents.

9 Are there specific issues and unfair practices you perceive on large online platform companies? 

5,000 character(s) maximum

The "conglomerate" effect described above is a result of many different mechanisms and tools operating at the same time. As many such online platforms companies are expanding into new sectors including healthcare, it is dangerous to rely on platforms that were not originally designed with (public) health in mind. Such services could enable the companies in question to obtain sensitive personal health and other data "through the backdoor", which they could use for targeted marketing and profiling purposes and to discriminate against vulnerable groups.

10 In your view, what practices related to the use and sharing of data in the platforms’ environment are raising particular challenges? 

5,000 character(s) maximum

See answer to previous question - the healthcare sector should not depend on platforms created by multinational companies only expanding into health because of profit-driven motives. This also includes their role in creating and implementing "track and trace" apps and other technologies in the name of public health.

11 What impact would the identified unfair practices can have on innovation, competition and consumer
12 Do startups or scaleups depend on large online platform companies to access or expand? Do you observe any trend as regards the level of dependency in the last five years (i.e. increases; remains the same; decreases)? Which difficulties in your view do start-ups or scale-ups face when they depend on large online platform companies to access or expand on the markets?

13 Which are possible positive and negative societal (e.g. on freedom of expression, consumer protection, media plurality) and economic (e.g. on market contestability, innovation) effects, if any, of the gatekeeper role that large online platform companies exercise over whole platform ecosystem?

Negative societal effects can and do indeed occur by relaying on a small number of global conglomerates to provide digital platforms for services across the board. This is dangerous and presents a major threat to public health.

14 Which issues specific to the media sector (if any) would, in your view, need to be addressed in light of the gatekeeper role of large online platforms? If available, please provide additional references, data and facts.

**Regulation of large online platform companies acting as gatekeepers**

1 Do you believe that in order to address any negative societal and economic effects of the gatekeeper role that large online platform companies exercise over whole platform ecosystems, there is a need to consider dedicated regulatory rules?

- [ ] I fully agree
- [ ] I agree to a certain extent
- [ ] I disagree to a certain extent
- [ ] I disagree
- [ ] I don’t know

2 Please explain

it must be clear that such platforms cannot bypass EU and national legislation and that they do not threaten our common values and fundamental rights.

3 Do you believe that such dedicated rules should prohibit certain practices by large online platform companies with gatekeeper role that are considered particularly harmful for users and consumers of these large online platforms?
4 Please explain your reply and, if possible, detail the types of prohibitions that should in your view be part of the regulatory toolbox.

3,000 character(s) maximum

Ensuring that harmful online advertising and targeting of vulnerable groups, including children, becomes outlawed.

5 Do you believe that such dedicated rules should include obligations on large online platform companies with gatekeeper role?

- Yes
- No
- I don't know

6 Please explain your reply and, if possible, detail the types of obligations that should in your view be part of the regulatory toolbox.

3,000 character(s) maximum

Gatekeepers have an even greater responsibility given their power in today's society.

7 If you consider that there is a need for such dedicated rules setting prohibitions and obligations, as those referred to in your replies to questions 3 and 5 above, do you think there is a need for a specific regulatory authority to enforce these rules?

- Yes
- No
- I don't know

8 Please explain your reply.

3,000 character(s) maximum

9 Do you believe that such dedicated rules should enable regulatory intervention against specific large online platform companies, when necessary, with a case by case adapted remedies?

- Yes
- No
- I don't know

10 If yes, please explain your reply and, if possible, detail the types of case by case remedies.

3,000 character(s) maximum

11 If you consider that there is a need for such dedicated rules, as referred to in question 9 above, do you think there is a need for a specific regulatory authority to enforce these rules?

- Yes
12 Please explain your reply

3,000 character(s) maximum

13 If you consider that there is a need for a specific regulatory authority to enforce dedicated rules referred to questions 3, 5 and 9 respectively, would in your view these rules need to be enforced by the same regulatory authority or could they be enforced by different regulatory authorities? Please explain your reply.

3,000 character(s) maximum

14 At what level should the regulatory oversight of platforms be organised?
- At national level
- At EU level
- Both at EU and national level.
- I don't know

15 If you consider such dedicated rules necessary, what should in your view be the relationship of such rules with the existing sector specific rules and/or any future sector specific rules?

3,000 character(s) maximum

16 Should such rules have an objective to tackle both negative societal and negative economic effects deriving from the gatekeeper role of these very large online platforms? Please explain your reply.

3,000 character(s) maximum

17 Specifically, what could be effective measures related to data held by very large online platform companies with a gatekeeper role beyond those laid down in the General Data Protection Regulation in order to promote competition and innovation as well as a high standard of personal data protection and consumer welfare?

3,000 character(s) maximum

The GDPR needs to adapt to the increased power of large online platform companies to ensure that consumers, fundamental rights and public health are protected.

18 What could be effective measures concerning large online platform companies with a gatekeeper role in order to promote media pluralism, while respecting the subsidiarity principle?

3,000 character(s) maximum

19 Which, if any, of the following characteristics are relevant when considering the requirements for a potential regulatory authority overseeing the large online platform companies with the gatekeeper role:
Institutional cooperation with other authorities addressing related sectors – e.g. competition authorities, data protection authorities, financial services authorities, consumer protection authorities, cyber security, etc.

- Pan-EU scope
- Swift and effective cross-border cooperation and assistance across Member States
- Capacity building within Member States
- High level of technical capabilities including data processing, auditing capacities
- Cooperation with extra-EU jurisdictions
- Other

21 Please explain if these characteristics would need to be different depending on the type of ex ante rules (see questions 3, 5, 9 above) that the regulatory authority would be enforcing?

3,000 character(s) maximum

22 Which, if any, of the following requirements and tools could facilitate regulatory oversight over very large online platform companies (multiple answers possible):

- Reporting obligation on gatekeeping platforms to send a notification to a public authority announcing its intention to expand activities
- Monitoring powers for the public authority (such as regular reporting)
- Investigative powers for the public authority
- Other

24 Please explain if these requirements would need to be different depending on the type of ex ante rules (see questions 3, 5, 9 above) that the regulatory authority would be enforcing?

3,000 character(s) maximum

25 Taking into consideration the parallel consultation on a proposal for a New Competition Tool (https://ec.europa.eu/eusurvey/runner/New_Competition_Tool) focusing on addressing structural competition problems that prevent markets from functioning properly and tilt the level playing field in favour of only a few market players. Please rate the suitability of each option below to address market issues arising in online platforms ecosystems. Please rate the policy options below from 1 (not effective) to 5 (most effective).

<table>
<thead>
<tr>
<th>Policy Option</th>
<th>1 (not effective)</th>
<th>2 (somewhat effective)</th>
<th>3 (sufficiently effective)</th>
<th>4 (very effective)</th>
<th>5 (most effective)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Current competition rules are enough to address issues raised in digital markets</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>
### 2. There is a need for an additional regulatory framework imposing obligations and prohibitions that are generally applicable to all large online platforms with gatekeeper power

3. There is a need for an additional regulatory framework allowing for the possibility to impose tailored remedies on individual large online platforms with gatekeeper power, on a case-by-case basis

4. There is a need for a New Competition Tool allowing to address structural risks and lack of competition in (digital) markets on a case-by-case basis.

5. There is a need for combination of two or more of the options 2 to 4.

26 Please explain which of the options, or combination of these, would be, in your view, suitable and sufficient to address the market issues arising in the online platforms ecosystems.

*3,000 character(s) maximum*

27 Are there other points you would like to raise?

*3,000 character(s) maximum*

### IV. Other emerging issues and opportunities, including online advertising and smart contracts

Online advertising has substantially evolved over the recent years and represents a major revenue source for many digital services, as well as other businesses present online, and opens unprecedented opportunities for content creators, publishers, etc. To a large extent, maximising revenue streams and optimising online advertising are major business incentives for the business users of the online platforms and for shaping the data policy of the platforms. At the same time, revenues from online advertising as well as increased visibility and audience reach are also a major incentive for potentially harmful intentions, e.g. in online disinformation campaigns.

Another emerging issue is linked to the conclusion of ‘smart contracts’ which represent an important innovation for digital and other services, but face some legal uncertainties.

This section of the open public consultation seeks to collect data, information on current practices, and informed views on potential issues emerging in the area of online advertising and smart contracts. Respondents are invited to reflect on other areas where further measures may be needed to facilitate innovation in the single market. This module does not address privacy and data protection concerns; all aspects related to data sharing and data collection are to be afforded the highest standard of personal...
data protection.

**Online advertising**

1 When you see an online ad, is it clear to you who has placed it online?
- Yes, always
- Sometimes: but I can find the information when this is not immediately clear
- Sometimes: but I cannot always find this information
- I don’t know
- No

2 As a publisher online (e.g. owner of a website where ads are displayed), what types of advertising systems do you use for covering your advertising space? What is their relative importance?

<table>
<thead>
<tr>
<th>Advertising System</th>
<th>% of ad space</th>
<th>% of ad revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intermediated programmatic advertising through real-time bidding</td>
<td></td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td>Programmatic advertising with guaranteed impressions (non-auction based)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Behavioural advertising (micro-targeting)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Contextual advertising</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3 What information is publicly available about ads displayed on an online platform that you use?

3,000 character(s) maximum

4 As a publisher, what type of information do you have about the advertisement placed next to your content/on your website?

3,000 character(s) maximum

5 To what extent do you find the quality and reliability of this information satisfactory for your purposes?

Please rate your level of satisfaction 🌟🌟🌟🌟🌟

6 As an advertiser or an agency acting on behalf of the advertiser (if applicable), what types of programmatic advertising do you use to place your ads? What is their relative importance in your ad inventory?

<table>
<thead>
<tr>
<th>Advertising System</th>
<th>% of ad inventory</th>
<th>% of ad expenditure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intermediated programmatic advertising through real-time bidding</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Private marketplace auctions</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Programmatic advertising with guaranteed impressions (non-auction based)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Behavioural advertising (micro-targeting)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
7. As an advertiser or an agency acting on behalf of the advertiser (if applicable), what type of information do you have about the ads placed online on your behalf?

3,000 character(s) maximum

8. To what extent do you find the quality and reliability of this information satisfactory for your purposes?

Please rate your level of satisfaction

---

**The following questions are targeted specifically at online platforms.**

10. As an online platform, what options do your users have with regards to the advertisements they are served and the grounds on which the ads are being served to them? Can users access your service through other conditions than viewing advertisements? Please explain.

3,000 character(s) maximum

11. Do you publish or share with researchers, authorities or other third parties detailed data on ads published, their sponsors and viewership rates? Please explain.

3,000 character(s) maximum

12. What systems do you have in place for detecting illicit offerings in the ads you intermediate?

3,000 character(s) maximum

---

**The following questions are open to all respondents.**

14. Based on your experience, what actions and good practices can tackle the placement of ads next to illegal content or goods, and/or on websites that disseminate such illegal content or goods, and to remove such illegal content or goods when detected?

3,000 character(s) maximum

15. From your perspective, what measures would lead to meaningful transparency in the ad placement process?

3,000 character(s) maximum

16. What information about online ads should be made publicly available?

3,000 character(s) maximum
All platforms should be obliged to have a library of all advertising they run, including information on their reach. This in order to allow for transparency and accountability. The "Ad Library" by Facebook provides an example to build upon.

17 Based on your expertise, which effective and proportionate auditing systems could bring meaningful accountability in the ad placement system?

3,000 character(s) maximum

18 What is, from your perspective, a functional definition of ‘political advertising’? Are you aware of any specific obligations attached to ‘political advertising’ at national level?

3,000 character(s) maximum

19 What information disclosure would meaningfully inform consumers in relation to political advertising? Are there other transparency standards and actions needed, in your opinion, for an accountable use of political advertising and political messaging?

3,000 character(s) maximum

20 What impact would have, in your view, enhanced transparency and accountability in the online advertising value chain, on the gatekeeper power of major online platforms and other potential consequences such as media pluralism?

3,000 character(s) maximum

21 Are there other emerging issues in the space of online advertising you would like to flag?

3,000 character(s) maximum

Currently there are uncertainties stemming from the e-Commerce Directive as to the enforcement of advertising legislation. This uncertainty is linked to the question of jurisdiction and application of rules. The DSA is a good opportunity to ensure that Member States can uphold and effectively enforce national public health measures on advertising, in order to enable governments to pursue their legitimate interest of protecting their citizens.

**Smart contracts**

1 Is there sufficient legal clarity in the EU for the provision and use of “smart contracts” – e.g. with regard to validity, applicable law and jurisdiction?

Please rate from 1 (lack of clarity) to 5 (sufficient clarity)

2 Please explain the difficulties you perceive.

3,000 character(s) maximum
3 In which of the following areas do you find necessary further regulatory clarity?

- Mutual recognition of the validity of smart contracts in the EU as concluded in accordance with the national law
- Minimum standards for the validity of "smart contracts" in the EU
- Measures to ensure that legal obligations and rights flowing from a smart contract and the functioning of the smart contract are clear and unambiguous, in particular for consumers
- Allowing interruption of smart contracts
- Clarity on liability for damage caused in the operation of a smart contract
- Further clarity for payment and currency-related smart contracts.

4 Please explain.

**3,000 character(s) maximum**

5 Are there other points you would like to raise?

V. How to address challenges around the situation of self-employed individuals offering services through online platforms?

Individuals providing services through platforms may have different legal status (workers or self-employed). This section aims at gathering first information and views on the situation of self-employed individuals offering services through platforms (such as ride-hailing, food delivery, domestic work, design work, micro-tasks etc.). Furthermore, it seeks to gather first views on whether any detected problems are specific to the platform economy and what would be the perceived obstacles to the improvement of the situation of individuals providing services through platforms. This consultation is not intended to address the criteria by which persons providing services on such platforms are deemed to have one or the other legal status.

The issues explored here do not refer to the selling of goods (e.g. online marketplaces) or the sharing of assets (e.g. sub-renting houses) through platforms.

*The following questions are targeting self-employed individuals offering services through online platforms.*

**Relationship with the platform and the final customer**

1 What type of service do you offer through platforms?

- Food-delivery
- Ride-hailing
- Online translations, design, software development or micro-tasks
- On-demand cleaning, plumbing or DIY services
- Other, please specify
2 Please explain.

3 Which requirements were you asked to fulfill in order to be accepted by the platform(s) you offer services through, if any?

4 Do you have a contractual relationship with the final customer?
   - Yes
   - No

5 Do you receive any guidelines or directions by the platform on how to offer your services?
   - Yes
   - No

7 Under what conditions can you stop using the platform to provide your services, or can the platform ask you to stop doing so?

8 What is your role in setting the price paid by the customer and how is your remuneration established for the services you provide through the platform(s)?

9 What are the risks and responsibilities you bear in case of non-performance of the service or unsatisfactory performance of the service?

**Situation of self-employed individuals providing services through platforms**

10 What are the main advantages for you when providing services through platforms?
   - 3,000 character(s) maximum

11 What are the main issues or challenges you are facing when providing services through platforms? Is the platform taking any measures to improve these?
   - 3,000 character(s) maximum

12 Do you ever have problems getting paid for your service? Does/do the platform have any measures to support you in such situations?
   - 3,000 character(s) maximum

13 Do you consider yourself in a vulnerable or dependent situation in your work (economically or otherwise), and if yes, why?
14 Can you collectively negotiate vis-à-vis the platform(s) your remuneration or other contractual conditions?
- Yes
- No

15 Please explain.

The following questions are targeting online platforms.

Role of platforms

17 What is the role of your platform in the provision of the service and the conclusion of the contract with the customer?

18 What are the risks and responsibilities borne by your platform for the non-performance of the service or unsatisfactory provision of the service?

19 What happens when the service is not paid for by the customer/client?

20 Does your platform own any of the assets used by the individual offering the services?
- Yes
- No

22 Out of the total number of service providers offering services through your platform, what is the percentage of self-employed individuals?
- Over 75%
- Between 50% and 75%
- Between 25% and 50%
- Less than 25%

Rights and obligations

23 What is the contractual relationship between the platform and individuals offering services through it?

24 Who sets the price paid by the customer for the service offered?
- The platform
- The individual offering services through the platform
- Others, please specify
25 Please explain.
3,000 character(s) maximum

26 How is the price paid by the customer shared between the platform and the individual offering the services through the platform?
3,000 character(s) maximum

27 On average, how many hours per week do individuals spend offering services through your platform?
3,000 character(s) maximum

28 Do you have measures in place to enable individuals providing services through your platform to contact each other and organise themselves collectively?
○ Yes
○ No

29 Please describe the means through which the individuals who provide services on your platform contact each other.
3,000 character(s) maximum

30 What measures do you have in place for ensuring that individuals offering services through your platform work legally - e.g. comply with applicable rules on minimum working age, hold a work permit, where applicable - if any?
(If you replied to this question in your answers in the first module of the consultation, there is no need to repeat your answer here.)
3,000 character(s) maximum

The following questions are open to all respondents

Situation of self-employed individuals providing services through platforms

32 Are there areas in the situation of individuals providing services through platforms which would need further improvements? Please rate the following issues from 1 (no improvements needed) to 5 (substantial issues need to be addressed).

33 Please explain the issues that you encounter or perceive.

3,000 character(s) maximum

34 Do you think individuals providing services in the 'offline/traditional' economy face similar issues as individuals offering services through platforms?

- Yes
- No
- I don't know

35 Please explain and provide examples.

3,000 character(s) maximum

36 In your view, what are the obstacles for improving the situation of individuals providing services:

1. through platforms?
2. in the offline/traditional economy?

3,000 character(s) maximum

37 To what extent could the possibility to negotiate collectively help improve the situation of individuals offering services:

- through online platforms?
- in the offline/traditional economy?

38 Which are the areas you would consider most important for you to enable such collective
VI. What governance for reinforcing the Single Market for digital services?

The EU’s Single Market offers a rich potential for digital services to scale up, including for innovative European companies. Today there is a certain degree of legal fragmentation in the Single Market. One of the main objectives for the Digital Services Act will be to improve opportunities for innovation and ‘deepen the Single Market for Digital Services’ (https://ec.europa.eu/info/publications/communication-shaping-europes-digital-future\_en).

This section of the consultation seeks to collect evidence and views on the current state of the single market and steps for further improvements for a competitive and vibrant Single market for digital services. This module also inquires about the relative impact of the COVID-19 crisis on digital services in the Union.

It then focuses on the appropriate governance and oversight over digital services across the EU and means to enhance the cooperation across authorities for an effective supervision of services and for the equal protection of all citizens across the single market. It also inquires about specific cooperation arrangements such as in the case of consumer protection authorities across the Single Market, or the regulatory oversight and cooperation mechanisms among media regulators. This section is not intended to focus on the enforcement of EU data protection rules (GDPR).

**Main issues**

1 How important are - in your daily life or for your professional transactions - digital services such as accessing websites, social networks, downloading apps, reading news online, shopping online, selling products online?

<table>
<thead>

</tr>
</tbody>
</table>

6 Have your services been subject to enforcement measures by an EU Member State other than your country of establishment?
- Yes
- No
- I don't know

8 Were you requested to comply with any 'prior authorisation' or equivalent requirement for providing your digital service in an EU Member State?
- Yes
- No
- I don't know

10 Are there other issues you would consider necessary to facilitate the provision of cross-border digital services in the European Union?
3,000 character(s) maximum

11 What has been the impact of COVID-19 outbreak and crisis management measures on your business’ turnover
- Significant reduction of turnover
- Limited reduction of turnover
- No significant change
13 Do you consider that deepening of the Single Market for digital services could help the economic recovery of your business?
○ Yes
○ No
○ I don't know

14 Please explain
3,000 character(s) maximum

The following questions are targeted at all respondents.

Governance of digital services and aspects of enforcement

The ‘country of origin’ principle is the cornerstone of the Single Market for digital services. It ensures that digital innovators, including start-ups and SMEs, have a single set of rules to follow (that of their home country), rather than 27 different rules.

This is an important precondition for services to be able to scale up quickly and offer their services across borders. In the aftermath of the COVID-19 outbreak and effective recovery strategy, more than ever, a strong Single Market is needed to boost the European economy and to restart economic activity in the EU.

At the same time, enforcement of rules is key; the protection of all EU citizens regardless of their place of residence, will be in the centre of the Digital Services Act.

The current system of cooperation between Member States foresees that the Member State where a provider of a digital service is established has the duty to supervise the services provided and to ensure that all EU citizens are protected. A cooperation mechanism for cross-border cases is established in the E-Commerce Directive.

1 Based on your experience, how would you assess the cooperation in the Single Market between authorities entrusted to supervise digital services?
5,000 character(s) maximum

2 What governance arrangements would lead to an effective system for supervising and enforcing rules on online platforms in the EU in particular as regards the intermediation of third party goods, services and content (See also Chapter 1 of the consultation)?
Please rate each of the following aspects, on a scale of 1 (not at all important) to 5 (very important).
<table>

3 Please explain
5,000 character(s) maximum

When it comes to online advertising and national public health protections for ensuring that health-harmful products and messages can be effectively controlled, EPHA believes that national governments must have the necessary mechanisms in place to protect their citizens. However, when it comes to other types of products or messages located more decisively in the "international" sphere, EU-level coordination and cooperation could be useful. There are many different types of digital services and a broader dialogue with civil society and other stakeholders is required to determine what they are exactly and how their could impact on national public health provisions and in a supranational context.

4 What information should competent authorities make publicly available about their supervisory and enforcement activity?
3,000 character(s) maximum

5 What capabilities – type of internal expertise, resources etc. - are needed within competent authorities,
in order to effectively supervise online platforms?

**3,000 character(s) maximum**

Experience from the enforcement of Lithuania's ban on alcohol advertising in nearly all media, including digital, shows the importance of having a system of firm penalties in place that can be quickly administered.

6 In your view, is there a need to ensure similar supervision of digital services established outside of the EU that provide their services to EU users?

- Yes, if they intermediate a certain volume of content, goods and services provided in the EU
- Yes, if they have a significant number of users in the EU
- No
- Other
- I don’t know

7 Please explain

**3,000 character(s) maximum**

8 How should the supervision of services established outside of the EU be set up in an efficient and coherent manner, in your view?

**3,000 character(s) maximum**

9 In your view, what governance structure could ensure that multiple national authorities, in their respective areas of competence, supervise digital services coherently and consistently across borders?

**3,000 character(s) maximum**

10 As regards specific areas of competence, such as on consumer protection or product safety, please share your experience related to the cross-border cooperation of the competent authorities in the different Member States.

**3,000 character(s) maximum**

11 In the specific field of audiovisual, the Audiovisual Media Services Directive established a regulatory oversight and cooperation mechanism in cross border cases between media regulators, coordinated at EU level within European Regulators’ Group for Audiovisual Media Services (ERGA). In your view is this sufficient to ensure that users remain protected against illegal and harmful audiovisual content (for instance if services are offered to users from a different Member State)? Please explain your answer and provide practical examples if you consider the arrangements may not suffice.

**3,000 character(s) maximum**

Through harmonised procedures for dealing with complaints

12 Would the current system need to be strengthened? If yes, which additional tasks be useful to ensure a more effective enforcement of audiovisual content rules?

Please assess from 1 (least beneficial) – 5 (most beneficial). You can assign the same number to the same actions should you consider them as being equally important.
## Final remarks

If you wish to upload a position paper, article, report, or other evidence and data for the attention of the European Commission, please do so.
