

Action plan for the development of EU organic production - public online questionnaire

Fields marked with * are mandatory.

Introduction

The aim of this public consultation is to collect the opinion of stakeholders and the public on challenges and opportunities to increase the production and consumption of organic food. Your answers will feed into a European Commission communication to be published early in 2021. This communication will lay the ground for concrete action in line with the European Commission's objectives of ensuring that at least 25% of the EU's agricultural land is under organic farming by 2030 and that there is a significant increase in organic aquaculture. These objectives ultimately aim to both improve the sustainability of the food system and revert biodiversity loss.

About you

* Language of my contribution

* Publication privacy settings

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

Anonymous

Only your type of respondent, country of origin and contribution will be published. All other personal details (name, organisation name and size, transparency register number) will not be published.

Public

Your personal details (name, organisation name and size, transparency register number, country of origin) will be published with your contribution.

I agree with the [personal data protection provisions](#)

Section 1: General – the state of organic production today

Organic production today covers some 8% of total utilized agricultural area and organic aquaculture accounts around 5% of total aquaculture production in the EU. Although this is a significant increase compared to the past, there is still significant room to increase these shares. The aim of this section is to identify the main bottlenecks to the production and consumption of organic food.

1. To what extent are the following factors obstacles to greater production and consumption of organic food in the EU today?

at least 15 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
Retail price of organic products too high	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Price of organic products at suppliers too high	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Not profitable enough for producers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Too expensive for consumers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Insufficient consumer demand	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Lack of consumer confidence in organic production methods	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Lack of consumer awareness of the EU label	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Lack of consumer confidence in the EU label	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Insufficient financial incentives for producers to convert to organic production	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Low interest from retailers in giving organic products shelf-space	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Low consumer awareness of the benefits of organic production for climate and the environment	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Competition with other ways of producing and/or other schemes	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Competition with private label products	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
There are too many ecological food schemes that can be confused with organic	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
I don't see any problems	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

Other (please specify):

2. The COVID-19 crisis has had many significant impacts on different sectors, including on the food system and the production and consumption of organic food. To what extent do you agree with the following statements?

at least 4 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
The crisis has strengthened organic farming and its role in EU food supply	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The crisis has accelerated structural changes in our food consumption in favour of organic farming	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The crisis has shown our reliance on seasonal labour in farming	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
In the post-crisis period, the greater demand for organic products reported by the sector will be maintained	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 2: Organic for all - stimulating demand and consumer confidence

Consumption of organic products per capita varies greatly among EU Member States. This section aims to identify concrete measures to stimulate the consumption of organic products and to ensure that consumers feel confident that the organic products they buy are produced according to such standards.

3. To what extent do you agree with the following statements?

at least 9 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
The EU organic logo is not sufficiently recognised	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Information campaigns for the EU organic logo are needed	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
More awareness is needed on the environmental and climate benefits of organic farming	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Campaigns to promote agricultural products should specifically target organic products	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Price competitiveness of organic products should be improved	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Schemes in schools to promote healthy diets should focus on organic products	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Food served in public/private offices and canteens should focus on organic products	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The range of organic products at retailers should be broader and more visible	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Authorities should use much more public procurement to boost organic consumption	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Other (please specify):

4. Demand for organic products also depends on consumer confidence that the products are produced in line with organic standards. To what extent do you agree that the following actions are important?

at least 7 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
Reasons for lack of consumer confidence should be explored	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Consumers should be able to clearly distinguish between the EU organic logo and other environmental/quality schemes	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It should be easier to trace organic products back to their origin	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
The information on organic producers should be transparent and available for consumers	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Information technologies such as blockchain (data shared across a network of computers) should be used more often to improve tracing of organic products	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Compliance with the rules for organic production must be better controlled by public authorities	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
More effort is needed to tackle fraud in the organic sector	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Other (please specify):

Section 3: Promoting organic production

The share of land under organic farming varies considerably across EU Member States, ranging from some 2% in Romania to 24% in Austria. One reason for these differences could be the lack of structures in the supply chain to allow producers to benefit from the added value created by organic production. This section will help identify the main measures to: (i) stimulate conversion to organic agriculture and aquaculture and (ii) strengthen the value-chain for operators who have opted for organic production.

5. To what extent are the following measures important to stimulate the production of organic products?

at least 10 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
The EU's Common Agricultural Policy and the support it provides should target organic production	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Other financial support for organic production is also needed (e.g. national, local or other public and private initiatives)	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Provide sufficient training and advice on organic farming (including visits and pilot farms) to stimulate conversion especially in regions lagging behind the EU average	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
More research is needed to develop plants with greater resistance to pests and to extreme and variable climate conditions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Investments (including in research and innovation) are needed to scale up labour-saving technologies	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>

Improve information and data on developments in the organic market to facilitate decisions for producers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Improve information and data on developments in the organic market to support decision making for retailers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Help organic producers to better organise (e.g. producer organisations) to improve their bargaining power	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Investments (including in research and innovation) for organic food processing	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Strengthen local and small-scale processing and foster short supply chains	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

6. Organic animal husbandry must comply with higher standards than conventional animal husbandry. There are also higher standards for organic aquaculture. To what extent do you agree with the following statements?

at least 4 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
Organic animal production should benefit from specific support	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Producers should be helped to find appropriate organic feed for animal nutrition	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
More research is needed to identify and develop best practices on feeding methods suitable for organic feed, and alternative feeding ingredients	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Aquaculture should be supported to gain more knowledge on breeding and feeding methods, including through research	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 4: Societal benefits – the contribution to climate and environment

One of the aims of organic farming is to combine agricultural production with respect for the environment and climate. It aims to preserve biodiversity, soil fertility, and aquatic ecosystems while allowing producers to make a decent living. This section will provide us with concrete ideas on how organic farming can be a model for: (i) more sustainable practices in farming and aquaculture, (ii) greater use of renewable resources, and (iii) greater animal welfare, while maintaining European food production.

7. What are the main environmental advantages of organic production?

at least 8 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
Organic farming is beneficial to biodiversity	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It responsibly uses energy and natural resources, such as water	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It reduces leakage of nitrates into water and thus protects water quality	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
It protects soil quality	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It helps reduce air pollution	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It promotes a circular economy by using bio-based materials	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
It promotes carbon neutrality by reducing emissions of greenhouse gases and storing carbon in soil	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
It allows for adaptation to a changing climate	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

8. To further increase the benefits of organic farming for the environment and climate, to what extent do you agree with the following measures?

at least 6 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
Funding to increase the availability of species suitable for organic production, notably through research	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
More investment on organic agricultural research and innovation	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Networks of organic farms to act as demonstration projects and promote best practices	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Phase out of contentious inputs (e.g. copper) still used in organic farming	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Promote the replacement of plastics in packaging with fully recyclable or biodegradable materials	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Promote the sustainable use of water in organic farming	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Section 5: Conclusions – the role of the EU and the road ahead

The EU has actively promoted organic production as a pillar of its Common Agricultural Policy while also supporting the increase of organic aquaculture. However, local producers, national authorities and producer organisations also play an important role. This section will help us understand whether the EU should intensify its actions in favour of organic production and consumption, or whether these actions should be devolved to the national/local level. The final question provides you with an opportunity to present your own proposals for how the production and consumption of organic food can be strengthened, in addition to those proposals identified earlier in the questionnaire.

9. To what extent do you agree with the following statements?

at least 3 answered row(s)

	Strongly agree	Somewhat agree	Somewhat disagree	Strongly disagree	Don't know
The main responsibility for promoting organic production and consumption lies at national level	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
The development of organic production should be left to the market with no specific support	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
The development of the organic sector requires a mix of EU and Member State support as well as private initiatives	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

10. Are there any more specific or additional actions that you would suggest?

1000 character(s) maximum

11. Please upload your position paper here, if you have one.

You may upload a document incorporating additional observations and views on the subject. Please keep the contents of any such document concise and focused on the subject of the consultation.

Please note that the uploaded document will be published in its entirety alongside your response to the questionnaire, which remains the essential input to this public consultation. The document is optional and serves as additional background to better understand your position.

The maximum file size is 1 MB

Only files of the type pdf,txt,doc,docx,odt,rtf are allowed
