The Roma Health Network is a free to join non-statutory network hosted by the European Public Health Alliance. It is a public health community striving to eliminate health and social inequalities between Roma and non-Roma by tackling the uneven distribution of environmental and social determinants responsible for physical and mental health and well-being.. It comprises of organisations, academics, experts, researchers and activists working with different social and economic groups among Roma. The network commits to improve Roma health by addressing inequalities in access to rights and services through research, advocacy, monitoring and community organising
