

STOP - Science and Technology in childhood Obesity Policy
fourth STOP Stakeholder Dialogue – SAVE THE DATE

Online, 22 March 2022, 12.45-16.30 (CET)

Dear STOP stakeholder,

You are cordially invited to the fourth STOP Stakeholder Dialogue, organised as part of the STOP project, which will take place **virtually** on **Tuesday 22 March 2022**.

The STOP stakeholder dialogues aim to provide a space for discussion to learn from individuals from different backgrounds and sectors who are actively involved in addressing childhood obesity and to recommend to national authorities and the European Commission a sustainability plan for future stakeholder engagement on childhood obesity. Identifying and understanding the views and positions of a wide range of stakeholders will be vital for developing successful recommendations.

The fourth STOP Stakeholder Dialogue builds on the previous-held three fruitful STOP dialogues, two EU-wide online surveys, and national surveys disseminated across eight member states. The first STOP stakeholder dialogue was held in Brussels in 2019, the second one was organised online in 2020 and the third dialogue was also held online during the STOP & Best-ReMaP conference in November 2021. The fourth Dialogue will provide the opportunity to discuss ongoing work on a sustainability plan for stakeholder engagement and on building blocks for an accountability framework, bringing together different parts of the STOP project's activities on multi-stakeholder engagement. Thanks to your contributions to date, we have collected new knowledge and insights which will be integrated into the sustainability plan and recommendations for further stakeholder engagement in the EU.

You are kindly invited to join us for this last, fourth STOP Stakeholder Dialogue and to contribute with your views, by registering through the following link:
<https://anketa.nijz.si/a/128076>.

We are looking forward to welcoming you to the final dialogues. We would kindly ask you to confirm your attendance by registering by **Tuesday 15th March at the latest**.

Yours faithfully,

Prof. Franco Sassi
STOP Project Coordinator
Professor of International Health Policy &
Economics, Imperial College London

Dr. Mojca Gabrijelčič
STOP WP10 Leader
Senior Advisor, National Institute of Public
Health Slovenia
