WHO European Health Report 2021

World Health Organization

The aims of the 2021 edition are to provide insight into Regional progress towards the health-related Sustainable Development Goals and the effects of the COVID-19 pandemic on population health, thereby focusing on health inequalities and how the pandemic is affecting these.

BMJ: Racial health inequality is stark and requires concerted action, says review

There is a clear and overwhelming case for radical action on racial inequity in the healthcare system, a review has concluded. The damning report, commissioned by the NHS Race and Health Observatory, found "widespread" ethnic inequalities across a range of health services, with some communities found to have particularly poor access, experiences, and outcomes.
