In the spotlight

Launch of the Healthier Together – EU Non-Communicable Disease Initiative

The European Commission presented the initiative covering five key areas, and guidance and implementation toolkit. In her opening remarks, Commissioner Stella Kyriakides said:

"Our great ambition today is to turn some of the knowledge we have developed together over recent years into concrete, impactful actions for the benefit of our citizens and to reduce some of the terrible health inequalities we see across our Union."

EPHA President – Alice Chapman-Hatchett – also took part in the panel discussion.

WHO Policy Brief: Fiscal policies to promote healthy diets

This policy brief provides policy-makers, programme managers, health professionals and advocates with information and policy options related to the implementation of fiscal policies to promote healthy diets. Carefully designed taxes could reduce health inequities, if the tax revenue is used progressively and if in combination with subsidies.

How many healthy life years for EU men and women?

Eurostat

This Eurostat report analyses healthy life years at birth across European member states, comparing the gap between men and women. On average, women have 64,5 healthy life years compared to 63,5 years among men. The average life expectancy for women in the EU is 83,2 years while for men it is 77,5, denoting a gap of 5,7 years.

Fostering social rights: key to EU recovery from COVID-19

EU Agency for Fundamental Rights

The pandemic triggered unprecedented EU financial support to counter the social impact of Covid-19. Many people in the EU, especially vulnerable people, faced reduced access to healthcare, childcare, education and the internet. This has led to excess mortality, poverty, unemployment and social exclusion. FRA's Fundamental Rights Report 2022 outlines the pandemic's wide-ranging impact on social rights. It also suggests how to address increasing inequalities and threats to societal cohesion.

Editorial: The price of war

Organisation for Economic Co-operation and Development

The extent to which growth will be lower and inflation higher will depend on how the war evolves, but it is clear the poorest will be hit hardest. The price of this war is high and will need to be shared.

United Nations Human Rights Report 2021

United Nations High Commissioner for Refugees

This report presents the progress achieved in 2021 against the targets set out in the OHCHR Management Plan 2018-2021, which has been extended to 2023. It also shows how UN addressed the challenges highlighted and reinforced by the COVID-19 pandemic with respect to human rights, and the efforts made towards building forward better. It includes an overview of management, funding, and expenditure as well as detailed results from the field and headquarters.

Roma Health

Page Not found

Big Issue North

For some, healthcare digitisation has worked well, so far, often mitigating the need for a time-consuming face-to-face appointment. For other demographics, however, the move has further decreased their chances of accessing healthcare at all. One such demographic is the Roma population. Around two thirds of Big Issue North vendors are Roma –and despite facing greater health risks, they are less likely to seek medical help when compared to British vendors.

End the Deplorable Situation of Roma People Living in Europe Now

Renew Europe

Renew Europe welcomes the adoption by the Committee on Employment and Social Affairs of the Renew Europe-led resolution on "The situation of Roma people living in settlements in the EU". The resolution recalls the urgent need for concrete measures at both EU and national level to tackle the dire situation of marginalised Roma people living across Europe, predominantly in settlements, which lack basic infrastructure and services and contravene human dignity and rights.
