WEBINAR | Tackling Antimicrobial Resistance in Food Production: A One Health Perspective

Date: Nov 26, 2025, 14:30-16:00 CET

Description

Antimicrobial resistance (AMR) poses a growing threat to global health, food safety, and sustainable agriculture. This webinar brings together leading international experts to discuss how science, policy, and coordinated action can help mitigate AMR across the food production chain.

Speakers will explore global and European initiatives, scientific evidence, and practical tools to promote responsible use of antimicrobials in animals and food systems.

Event partners

European Public Health Alliance

Una Europa Alliance

Event programme

14:30 – 14:35 Opening, by Jaisalmer de Frutos Lucas (Policy Manager, EPHA)

14:35 – 14:40 Introduction, by Bruno Gonzalez-Zorn (Complutense University of Madrid)

14:40 – 15:40 Panel Discussion *Tackling Antimicrobial Resistance in Food Production*

- **Jorge Matheu Alvarez**, Scientist, Governance, Coordination and Monitoring Unit, AMR department, World Health Organization
- **Dr Ernesto Liebana,** BIOHAZ Team Leader, European Food Safety Authority
- **Dr Azucena Mora**, Professor of Microbiology, Faculty of Veterinary Medicine of Lugo, University of Santiago de Compostela
- **Dr Wannes Vanderhaeghen,** Head of Data Analysis Unit, AntiMicrobial Consumption and Resistance in Animals

15:55 – 16:00 Closing remarks, by Jaisalmer de Frutos Lucas (Policy Manager, EPHA)

Moderator: Prof. Bruno Gonzalez-Zorn, Full Professor and Head of the Antimicrobial Resistance Unit (ARU) at the Complutense University in Madrid, Chair of One Health in the Alliance Una Europa, and Expert Advisor at EPHA.
